alpha-glucosidase (EC 3.2.1.20) precursor, lysosomal - human NyAlternate names: acid alpha-glucosidase; acid maltase-glucoamylase C;Species: Home sapiens (wan) C;Decies: Home sapiens (wan) C;Date: 21-May-1990 #sequence revision 05-Apr-1995 #text change 18-Jun-1999 C;Accession: A40577; A32609; Ā35698; S00831; S18847; I52309; S63526 R;Martiniuk, F.; Bodkin, M.; Tzall, S.; Hirschhorn, R.

```
A Description: also has EC 3.1.2.3 activity; hydrolyzes alpha 1,4 and alpha 1,6 glycos A; Description: also has EC 3.1.2.3 activity; hydrolyzes alpha 1,4 and alpha 1,6 glycos A; Note: deficiency causes glycogen storage disease type II (Pompe's disease); Superfamily: lysosomal alpha-glucosidase; sucrase/isomaltase homology; trefoil homology (TRF) P; 82-130/Domain: trefoil homology (TRF) P; 82-130/Domain: sucrase/isomaltase homology <SIM>P; 69-70/Cleavage site: Gln-Ala (unidentified proteinase) #status experimental P; 82-109, 92-108, 103-127/Disulfide bonds: #status predicted F; 122-123/Cleavage site: Met-Gly (unidentified proteinase) #status experimental
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        A;Residues: 1-90, 'N',92-129 <MA3>

JC4624 alpha-glucosidase (EC 3.2.1.20) - Rhizomucor circinelloides f. circinelloides

C; Species: Rhizomucor circinelloides f. circinelloides
C; Date: 10-May-1996 #sequence_revision 19-Jul-1996 #text_change 20-Jun-2000
C; Accession: 704624; PC4149
R; Sugimoco, M.; Suzuki, P.
J. Biochem. 119, 500-505, 1996
A; Title: Molecular cloning, sequencing, and expression of a cDNA encoding alpha-glucos A; Reference number: JC4624; MUD: 96271012; PMID: 8830045
A; Accession: JC4624
A; Molecule type: mRNA
A; Residues: 1-664 < SUG1>
A; Molecule type: mRNA
A; Residues: 1-664 < SUG1>
A; Molecule type: protein
A; Residues: 203-214;492-495;612-623;715-731;742-751;769-778 < SUG2>

C; Comment: This enzyme is an exo-carbohydrase, and catalyzes the splitting of an alpha well as soluble starch.
C; Superfamily: lysosomal alpha-glucosidase; sucrase/isomaltase homology; trefoil homol C; Reywords: glycoprotein; glycosidase; hydrolase
F; 122-805/Domain: sucrase/isomaltase homology < SIM>

C.Function:
A.Gene: SI
C.Function:
A.Pescripption: sucrose alpha-glucosidase catalyzes the hydrolysis of the 1,2-alph
A.Pathway: carbohydrate digestion
C.Superfamily: sucrase/isomaltase, sucrase/isomaltase homology; trefoil homology
C.Keywords: carbohydrate digestion; glycosidase; hydrolase
F.199-846/Domain: sucrase/isomaltase homology <SIM>
F.199-846/Domain: trefoil homology <TRF>

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ద
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ò
                                                                                                                                                                               A Description: sucrose alpha-glucosidase catalyzes the hydrolysis of the 1,2-alpha-D-glu A; Pathway: carbohydrate digestion

A; Pathway: carbohydrate digestion

B; Superfamily: sucrase/isomaltase; sucrase/isomaltase homology; trefoil homology

C; Keywords: carbohydrate digestion; duplication; glycoprotein; glycosidase; hydrolase; m

F; 2-1007/Product: oligo-1,6-glucosidase (isomaltase chain) #status experimental <1SO>
F; F; 3-150Pomain: membrane associated #status predicted <TMM>
F; 43-65/Region: serine/threonine-rich

F; 43-65/Region: serine/threonine-rich

A;Description: oligo-1,6-glucosidase catalyzes the hydrolysis of 1,6-alpha-D-glucosidi A;Pathway: carbohydrate digestion . SiDescription: sucrose alpha-glucosidase catalyzes the hydrolysis of the 1,2-alpha-D-g A;Pathway: carbohydrate digestion . SiDescription: sucrase/isomaltase homology; trefoil homology C;Superfamily: sucrase/isomaltase homology; trefoil homology C;Keyworse: carbohydrate digestion; duplication; glycoprotein; glycosidase; hydrolase, F;2-1007/Product: oligo-1,6-glucosidase (isomaltase chain) #status experimental wATI>F;13-32/Domain: membrane associated #status predicted <PWMA.
